

## MSP's Cloud Analytics Trial – developed in partnership with IBM

### Objectives

The trial is intended to encourage you to take your first step into Cloud Analytics, to provide experience with Cloud Analytics technology, address any questions you might have, and show how Cloud Analytics can bring tangible benefits to your business.

### High-level summary

- Fixed price, fixed timescale trial of Cloud Analytics technology
- A complete Cloud Analytics platform hosted on IBM Cloud
- 25 days of Consulting and Development assistance to install and configure the platform, gather requirements and carry out functional tests using your own data
- Product education and skills transfer
- Evaluation workshop, and a road-map for future development

### Fixed price, fixed timescale Cloud Analytics trial
